Viscous Fluids Flow meter – MSOF

فلومترهاى ييستوني

	: 30bar (اختيارى؛ 200bar)	فشار	AISI316 :	بدنه
	: 40°C كا 180°C	دمای کار ی	316SS :	ييستون
	: لختیاری / سوئیج و یا A-20 mA	خروجى	: 100 میلی متر	فطر نمایشگر
	: عمودي / افقى	نحوه اتصال	3% F.S. :	حساسيت
ک)	: بیشینه 400 cSt (400 سانتی استو،	ويسكوزينه	: مايعات با ويسكوزيته بالا	نوع سيال

Technical Features

Measuring Range-Water-Gas 0,4... 2 Nm3/h -140 ... 740Nm3/h

Viscosity Limit <200 cP

Connection Size 1/4"...2 1/2", Threaded, Flanged

Wet Parts AISI316

Temperature -40...180°C max.

Pressure 30 bar max. (ops. 100 ve 200 bar)

Accuracy <+3% F.S.

Output Ops. Contact or 4-20 mA **Protection** P66 (ops. Ex d ex proof)

Application Liquids

Features

Design for High Pressure and Temperature Special Scale Possibility for Different Density Values **High Viscosity Fluids Contact or Analog Output** Can Be Connected Horizontally or Vertically

Top-Class External Protection

Bass Instruments, MSOF Series Metal Tube Flow meters with variable area, are heavy-duty flow meters designed to measure liquid fluids. It can be used as easily as 200 CP viscosity (water resistance value). The display part is not physically connected to the measuring tube. Thus, even if your fluid is not transparent, a clear reading is provided on the display. Our product, which is not affected by the mounting position, can be connected to the pipes either horizontally or vertically. Optional 4 for remote monitoring...20 mA or contact output options are available. MS of Series variable area metal tube Decimeters with threaded or flanged connections can be connected to the installation in a very short time.
