## 1. Introduction

### 1.1 General Information for the users

Thank you for purchasing Young Tech Co., Ltd products. Each product has been fully inspected after its production to offer you the highest quality and reliable performance. Please read the product manual carefully prior to installing and commission the product.

- The manual should be provided to the end-user.
- **Factory Mutual approved Intrinsically Safe and Non-Ignitive units must be Installed Per drwg SKC\_18601\_150326.pdf**
- **CSA approved Intrinsically Safe and Non-Ignitive units must be Installed Per drwg SKC-8465.pdf**
- The manual can be altered or revised without any prior notice. Any changes in product's specification, design, and/or any components may not be printed immediately but until the following revision of the manual.
- When the manual refers to "**Valve Zero / Zero**" means the final valve position upon pneumatic pressure has been fully exhausted from positioner's OUT1 port. The valve zero position may differ between linear direct and reverse actions. (DA/RA)
- The manual should not be duplicated or reproduced for any purpose without prior approval from Young Tech Co., Ltd, Gimpo-si, South Korea.
- In case of any other problems that are not stated in this manual, please make immediate contact to Young Tech co., Ltd.
- Positioner is an accessory of the control valve, so please make sure to read the applicable instruction manual of the control valve prior to installation and operation.

### 1.2 Manufacturer Warranty

- For the safety, it is important to follow the instructions in the manual. Manufacturer will not be responsible for any damages caused by user's negligence.
- Any modifications or repairs to the product may only be performed if expressed in this manual. Injuries and physical damages caused by customer's modifying or repairing the product without a prior consultation with Young Tech co., Ltd will not be compensated. If any alterations or modifications are necessary, please contact Young Tech Co., Ltd directly.
- Manufacturer warrants the product from the date of original purchase of the product for eighteen (18) months, except as otherwise stated.
- Manufacturer warranty will not cover products that have been subjected to abuse, accidents, alterations, modifications, tampering, negligence, misuse, faulty installation, lack of reasonable care, repair or service in any way that is not contemplated in the documentation for the product, or if the model or serial number has been altered, tampered with, defaced or removed; damages that occurs in shipment, due to act of

God, failure due to power surge, or cosmetic damage. Improper or incorrectly performed maintenance will void this limited warranty.

- For detailed warranty information, please contact the corresponding local Young Tech Co., Ltd office or main office in South Korea.

### 1.3 Explosion Proof Warning (Only for Intrinsic safety type positioners)

Please ensure the unit is being used and installed in conformity with local, regional, and national explosion proof within the proper safety barrier environment.

- Refer to "2.6 Certifications"
- Explosion proof type of cables and gaskets should be used, when explosion gases are present at the installation site.
- Positioner has 2 ports for power connection. Explosion proof type wires and packing should be used. Blind plug is required when any port is not being used.
- Ring terminal with surface area of more than  $0.195\text{mm}^2$  with M4 spring washer should be used to connect the power.
- For external ground terminal, ring terminal with surface area of more than  $5.5\text{mm}^2$  should be used.
- Wiring in these applications shall utilize appropriate methods for Class I, Division 2 / Zone 2
- Substitution of components may impair intrinsic safety.
- Substitution of components may impair suitability for Class I, Division 2.
- EXPLOSION HAZARD. Do not connect or disconnect wiring unless all sources of power have been removed or the area is known to be non-hazardous.

(French) RISQUE D'EXPLOSION. Ne pas raccorder ou débrancher le câblage à moins Toutes les sources d'énergie ont été enlevées ou la zone est connue pour être non dangereux.

- The enclosure of models YT-3300, YT-3301, and YT-3303 contains aluminum, which is considered to constitute a potential risk of ignition when subjected to impact or friction. Care must be used during installation in locating this equipment to prevent impact or friction
- Parts of the enclosure are made of non-metallic materials. To prevent the risk of Electrostatic sparking, clean the enclosure only with a damp cloth.
- The product must be installed in such a manner as to minimize the risk of impact or friction with other metal surfaces.
- For Intrinsically Safe installations, the product must be connected to suitably rated intrinsically safe equipment, and must be installed in accordance with applicable intrinsically safe installation standards.

## 2. Product Description

### 2.1 General

YT-3300 / 3350 / 3303 / 3301 series Smart Valve Positioner accurately controls valve stroke in response to an input signal of 4~20mA from the controller. Built-in micro-processor optimizes the positioner's performance and provides unique functions such as **Auto-Calibration, PID Control, and HART Protocol Communications.**

### 2.2 Main Features and Functions

- LCD display enables users to monitor the positioner status.
- User will easily understand the method of using 4 buttons because it work same in all versions of firmware interfaces.
- When unexpected situation like momentary blackout happens, our positioner boot-time only take 0.5 second and this can minimize the travel of valve which consequentially increase the safety of system.
- Positioner operates normally even there are sudden changes in supply pressure and / or high vibration environment.
- YT-3301 remote positioner is stronger on high temperature and vibration environment because it is separated into feedback sensor and positioner.
- The method of Auto Calibration is very simple.
- As an advantage of having very low air consumption, It could greatly reduce operating costs in large-scale plants.
- It is compatible with most of controllers.
- Orifices can be installed even in the field to minimize the hunting occurrence and optimize operating conditions.
- Various information about positioner can be processed by HART communication (HART option)
- Valve system becomes more stable by outputting analog feedback signal.
- Different valve characteristics can be adjusted – Linear, Quick Open, Equal Percentage, and Custom which user can make 18 points characterizations.
- Tight Shut – Close and Shut - Open can be set.
- PID parameters can be adjusted in the field without any additional communicator.
- A/M switch can be used to direct supply air to the actuator or to manually operate the positioner or valve without any signal.
- Split range 4~12mA or 12~20mA can be set.
- Operating temperature for sensor module of YT-3301 is -40 ~ 120°C.  
Operating temperature for positioners is -30 ~ 85°C or -40 ~ 85°C (Please check certified explosion proof temperature)
- Hand calibration function can set Zero point or End point manually.
- It has IP66, Type 4X(FM) protection grade.

- Epoxy polyester powder coating resists the corrosion process. (except YT-3350).
- Maintenance of the positioner is easy because of modularized inner structure.
- SIL2 certified.(For more information, see SIL Safety Instruction on homepage)

## 2.3 Label Description

- MODEL NUMBER: Indicates the model number and any options of the positioner.
- EXPLOSION PROOF: Indicates certified explosion proof grade.
- INPUT SIGNAL: Indicates input signal range.
- OPERATING TEMP.: Indicates the allowable operating temperature.
- AMBIENT TEMP.: Indicates the allowable ambient temperature for explosion proof.
- SUPPLY PRESSURE: Indicates the supply pressure range.
- Ui, li, Pi, Ci, Li: Indicates the allowable electrical data in the certificate.  
ATEX:  $Ui = 28 \text{ V}$ ,  $li = 93 \text{ mA}$ ,  $Pi = 651 \text{ mW}$ ,  $Ci = 0.6 \text{ nF}$ ,  $Li = 10 \mu\text{H}$   
FM:  $Ui = 28 \text{ V}$ ,  $li = 93 \text{ mA}$ ,  $Pi = 651 \text{ mW}$ ,  $Ci = 0.55 \text{ nF}$ ,  $Li = 12 \mu\text{H}$   
You can also see the details in the certificate.
- SERIAL NUMBER: Indicates unique serial number.
- YEAR : Indicates manufactured year.
